

Objective: \$1,002,636,412,860; without intervention: \$1,002,636,418,261 (Desired optimality gap: 80%; actual: 99%. Time to solve: 48s)

$C^I = \$10,000, C^D = \$10,000,000$

One Period=10 days (costs scaled by 1,000,000 during optimization)
