Objective: $1,002,636,411,241$; without intervention: $1,002,636,418,261$ (Desired optimality gap: 80%; actual: 99%. Time to solve: 37s)
$C^I = \$10,000, C^D = \$10,000,000$
One Period=10 days (costs scaled by 1,000,000 during optimization)
